

Dec. 11, 1855.

Dear Prof. Oliver,

Among the specimens sent last week by Dr. Green was a little alpine Composita of California named "*Raillardia* (S. *Kaillardella*) *acaulis*"

For that ticket, please to substitute the one here enclosed,

"*R. argentea*", I have a second Californian species, for you. But the being stemless, I have changed the name, which is not yet printed.

A Gray

Jan. 1, 1866

Dear Mother,

I enclose an note on an
of the San Francisco, Cal. Coast. Japan
I will have had some on Japan
The little bit come only

Many thanks, I'll be
Mamma's presence of little
at all in favor only, I will have
as part. It says it is very young.

and will try, than, friend, than to
have been collected.

There you have little
from Mexico like large - small

Day later, than has a, it not
than, now.

Accept my best wishes for
Happy New Year. I will have
Mother
